

UK Advanced Engineering 09

Developing Partnerships in Innovation for Global Growth

3rd & 4th February 2009, RBS Williams Conference Centre, Oxfordshire

UK Advanced Engineering 09 has been created to highlight UK innovation, develop partnerships and enable UK Advanced Engineering companies to grow international business through R&D.

Day One: Low Carbon Vehicles

The first day will focus on Low Carbon Vehicles and an invited audience of UK and Indian businesses will share expertise, explain the latest industry innovations and create an invaluable networking forum. Leading industry figures will give presentations and lead discussions on subjects including:

- Near to market technologies
- Next step technologies
- Step change technologies
- Alternative fuels

Day Two: Advanced Engineering

The second day of the event will bring together elite Advanced Engineering businesses from across the globe with a focus on advanced manufacturing, advanced materials, sensors & instrumentation and low carbon technologies. Included in the day will be:

- **Plenary addresses** from senior government speakers
- **Interactive workshops** on topics to include advanced materials, low-carbon automotive technology, advanced manufacturing and sensors and instrumentation
- **Brokered One to One Meetings** will be arranged with key international R&D decision-makers and potential partners.

Networking Dinner

3rd February 2009, Milton Hill House Hotel

This formal dinner will include a keynote speech from Iain Gray, Chief Executive of the Technology Strategy Board.
